TECHNICAL SPECIFICATIONS

System Compatibility: NMRReady-60e or 60PRO
Dimensions: 10.3x10.3x14.2" / 26x26x36cm
Weight: 12 lbs/5.5 kg
Voltage: 24 V
Time per tube change: ~10sec
Temp: 32°C
Carousels: 2

AUTOsample-60

**Maximize your efficiency
by automating
routine work.**

**Introducing the affordable,
easy-to-use
AUTOsampler-60.**

The AUTOsampler-60 mounts on top of any NMRReady-60e or 60PRO for painless interconversion between autosampler and manual mode, while still maintaining the notably minimal footprint. Data acquisition and processing is controlled at the touch of a finger through the onboard software.

EASY CONFIGURATION

- 1 Simple mounting on top of NMRReady-60
- 2 Operated through onboard software via NMRReady USB connectors
- 3 Interchangeable 25 NMR tube carousels (standard, constricted or J-Young tubes)
- 4 Robust and reliable tube changes ensure safety and accuracy
- 5 Optional sample tempering

SIMPLE OPERATION

Use onboard software to configure data acquisition of up to 25 different samples at one time.

- ✓ Set up structure elucidation or conformation protocols per tube
e.g., ^1H , COSY, HSQC, $^{13}\text{C}\{^1\text{H}\}$
- ✓ QA/QC for series of samples
